FEATURED MARKET DATA

Core Inflation Moderating

Though the path to lower inflation has been somewhat bumpy, the trend in Core PCE (Personal Consumption Expenditures), the Fed's preferred measure of inflation, continues downward. Year-over-year growth in Core PCE declined to 2.8% in February. The reading was aligned with economists' expectations following the CPI report earlier in March which exceeded expectations. Core services excluding energy & shelter decelerated significantly to 0.18% for the month. The reading was down from 0.66% for January and more in line with disinflationary trends that prevailed from May 2023 to Dec 2023. Core PCE is now significantly below the 5.50% upper range of the Fed Funds target rate.
